

Upcoming InRoad Workshop

The role of structural funds in the mix of funding sources for the long-term sustainability of Research Infrastructures

University Campus of Santiago, Aveiro (Portugal)

13 April 2018

It is commonly agreed that there is an urgent need to better understand how to efficiently fund pan-European Research Infrastructures (RI), what are current policies for national and European funding and how these policies meet the needs of RI along their whole life cycle. Within InRoad's project activities, a series of regional workshops were foreseen in order to have the opportunity to discuss these issues with the scientific communities.

With this in mind, the goal of this upcoming **Regional Workshop** is to bring together stakeholders to:

- discuss the role and contribution of **European Structural and Investment Funds** in the mix of funding sources of Research Infrastructures.
- **share experience** by giving insights, experiences and suggestions
- provide **recommendations** for the next generation of structural funds and EU Framework Programme

The agenda of the event and the registration form will follow. Please note that registration is limited and participants will be selected based on their field of expertise and location to ensure a diverse representation at the event.
