

## Hungary – Evaluation and monitoring procedure

<b>1. Ex-ante Impact Assessment</b>
<b>1.1. Methodology and procedures conducted (if applicable)</b>
Not applicable or no information presently available.
<b>2. Procedure for selection of the research infrastructures to be included in the roadmap</b>
<b>2.1. Objectives of the evaluation</b>
Not applicable or no information presently available.
<b>2.2. Eligibility conditions</b>
Not applicable or no information presently available.
<b>2.3. Evaluation criteria for the selection of the RI to be included in the RI national roadmap</b>
Not applicable or no information presently available.
<b>2.4. Evaluation method and procedures conducted (organisation in charge, timing, selection of reviewers, configuration of panels, indicators, etc.) for the selection of the RI to be included in the RI national roadmap</b>
Not applicable or no information presently available.
<b>2.5. Proposals evaluated and selected (available statistics)</b>
Not applicable or no information presently available.
<b>3. Update / Monitoring and ex-post Evaluation of RI Roadmap</b>
<b>3.1. Objective of the monitoring of the RI national roadmap as a whole</b>
Not applicable or no information presently available.
<b>3.2. Periodicity of the RI national roadmap monitoring actions (if applicable)</b>
Not applicable or no information presently available.
<b>3.3. Methodology and procedures conducted (timing, approach, indicators, etc.) for monitoring the RI national roadmap</b>
Not applicable or no information presently available.
<b>3.4. Methodology and procedures conducted (timing, approach, indicators, etc.) for monitoring the individual RI included in the RI national roadmap</b>
<p>The regular evaluation of the Hungarian research infrastructures – in accordance with the Union methodologies, e.g., ESFRI – is essential for their development. This means a continuous, iterative process, as one result of which the demand for connections to foreign research infrastructures has been assessed. It is also recommended to operate an independent monitoring unit in the field of RI since the RI is one of the key elements of the National Innovation System.</p> <p>It is worth measuring the performance of research infrastructures by a separate indicator; this is also required because of the evaluation. Possible indicators are:</p> <ul style="list-style-type: none"> <li>• The number of publications by external researchers per research organisation (number)</li> <li>• The utilisation rate of research infrastructure by external researchers (%)</li> <li>• The average value of economically oriented projects implemented in research infrastructures (euro per project).</li> </ul>
<b>3.5. Methodology and procedures conducted in the case that an ex-post evaluation of the RI national roadmap is planned or has been implemented</b>
Not applicable or no information presently available.
